---

## Introduction

With the introduction of self-driving cars, the experience of being an operator or a passenger has completely changed. Now the focus of attention needs to be redirected to two major areas – internal systems and outside interests. Our new self-driving automobile, here at Acme Automotive Answers, needs to allow the operator and passenger to more easily modify internal comfort and entertainment systems, and to manipulate the outside observation systems for more intimate personal enjoyment.

## Internal Systems

Internal Systems now encompass the following:

- Comfort Systems
  - Personal Heat and Air Conditioning (Climate Control)
  - Personal Seat Comfort Controls
- Entertainment Systems
  - Private Audio / Video Systems
  - Where-Am-I GIS System with Area of Interest videos
  - Games – solo, intra-auto group, and global interactive
  - Hotspot and Internet Setup
- Driver Only
  - Auto Control Settings
  - Manual Controls
  - Window & Door Controls
  - Entertainment System Overrides
  - Intercom System
  - Comfort System Overrides
  - External Systems Overrides
  - Existing Information System (Info Button)

## External Systems

External Systems now encompass the following:

- Window Tint Control
- Window Monitor Projection Control and Area of Interest Identification
- Door Lock / Un-Lock Systems
